DESCRIPTION

Dow Corning® 3179 Dilatant Compound is a coral-colored silicone polymer that exhibits high elasticity, high bounce and a unique combination of rheological properties. It offers ease of movement under low mechanical force and yet exhibits excellent resistance to slump or flow when at rest.

HOW TO USE

Dow Corning 3179 Dilatant Compound is designed specifically for the novelty toy market for use by children to bounce, stretch and snap. Its non-slumping characteristic offers an additional dimension to this product. It can be used to mold simple shapes such as cubes, rectangles and pyramids and retain these shapes for weeks, a feature that can expand the scope of this product from the novelty to the educational. This resistance to static flow in combination with ease of manipulation is a feature of *Dow Corning* 3179 Dilatant Compound.

PERFORMANCE

Cleanup

If *Dow Corning* 3179 Dilatant Compound is worked into material or carpets, it may be removed by the careful application of 95 percent isopropyl alcohol and repeated blotting or brushing. As with all stain removal, check for colorfastness and resistance to fiber damage before applying isopropyl alcohol to an exposed area of the material.

NOTE: Always provide adequate ventilation when using any volatile solvent. Avoid heat, sparks and open flame. Follow all precaution listed on solvent container label.
